WEEKLY GLOBE-REPUBLIC. MAMMOTH DOUBLE SHEET!

Issued Every Thursday Morning, ONE DOLLAR A YEAR.

All communications should be addressed to KINNEY NICHOLS & CO.,

SATURDAY EVENING, JAN 17.

T. C. Campbell, of the Cincinnati jury system, is represented to be incubating something in a committee room of the Ohio legislature. It is suspected to be

The Republican caucus of the Pennsylvania legislature had to take only one ballot-for mere form. Cameron got 116 votes, and all the other candidates together got 50.

Bargar, of the house, has given notice of his intention to move to amend the rules so as to fine an absentee \$5 a day for absence. Move also, Bargar, that 5 days' absence shall forfeit the railroad

Leo Weltz, of Chinton county, says be is in the hands of his friends if they want to place him on the "old ticket" for member of board of public works. Leo is as good a feature of the "old ticket" as has been mentioned.

Allen O. Myers moved that a paid lobbyist of Van Antwerp, Bragg & Co. be removed from the floor of the house. There was a good deal of sensation, but the schoolbook man was not removed. V., B. & Co. have the privilege of the

We should not be surprised if Tecumseh Sherman felt that he had not done a wholly bad thing in stirring up the little Confederate army in the U.-S. senate to indiscreet and vicious yawps over Jeff. Davis. The country needed this little

It is stated that there is a two-year-old child in Cleveland, O., that has two tongues. The question whether it is male or female is less important now than it will be when it begins to practice on the English language in relation to butchers' bills and new dresses.

Evarts has got the bulge on the New-York legislature, as he has likewise on the New-York people. His brains are needed to represent the Empire State in the senate. Since Conkling's great brains soured on his mind, that big state has made a rather flimsy showing of intellect in the

Phelan is rapidly improving. He will soon be out and ready for business. He has been warned not to appear against Short, if he wants to save what life he has left. But he gives the O'Donovan-Rossa crowd to understand that Short may expect to have a fellow Phelan for him pretty soon, and it will not be a Phelan of triendship, either.

The Springfield daily GLOBE-REPUBLIC is one of the good newspapers in Ohio .- Na

Look here, we are not going to be outdone in this kind of thing: the Napoleon Signal, in that old Democratic stronghold is one of the livest, brightest, best-made, and most evidently prosperous Republican weeklies that come to this office. There! and it is true, too.

The investigation of the doings of the Hocking-Valley syndicates and of the do ings of the workingmen there which has been moved in the legislature is a proper measure. There should be a thorough exploration of all the causes which have brought about the deplorable state of affairs, and both sides should be carefully and patiently heard; and then, on the report of the commission, there should be some radical legislation for the compulsion of justice.

Mr. Secretary Chandler reports to the house, in obedience to its resolution, that the death of Cadet Strang at the naval academy was in no way due to hazing. But it is not denied that the hazing was done. And it appears that the boy soon after took sick and died. The connection between the brutal treatment and the death was so generally believed that congress took up the scandal; and, though Mr. Chandler is so certain about what did not cause the death, the investigation of the hazing onght to go on.

There is a project, which has ruffled the surface of the legislature now and then, for having the schoolbooks of the state printed in the penitentiary. It is a sensible project. All the public printing and all the schoolbooks might be manufactured there. The problem for the reformed penitentiary is work, and work that will compete as little as possible with free labor. The public printing is generally a job in which labor is very little interested; and the manufacture of most of the schoolbooks is a monstrous monoply of one house in Cincinnati. Let these two things be taken into the penitentiary; and the cheaper the work the better it will be for the whole people of the state. It is teasible and right.

Gov. Hill, of New York, lieutenant successor to Cleveland, in his first message recommends the abolition of hanging as s method of execution. He has seen so many bad pictures, during the campaign, of Sheriff Cleveland's performance in that line that it has made him sick. He thinks that science is adequate to the contrivance of some less painful and less brutal means of putting a murderer out of this misersble world. Hill's recommendation is opportune, and ought to receive consideration. Fill a convict's atmosphere with the tumes of chloroform and charge the grates of his cell with electricity. The thing can be done, and ought to be done.

They have begun to examine some wit. esses on the other side in the Springer investigation of Lot Wright. A good deal of mighty respectable testimony has already been got in to the effect that, as every fair man knows, there was an organized plot to capture Cincinnati by Democratic thugs and repeaters, and that the defeat of this plot by the officers of the United States is what is the matter with little Mr. Follett. One witness from Kentucky was proceeding to tell what he knew-and he showed that he knew horrid lots-about a grand importation of Kentucky voters into Cincinnati for Democratic purposes, when he was suddenly and peremptorily ruled out, and not permitted to tell his story. He told it briefly to a reporter afterward, and said he could substantiate it; and it was very judiciously ruled out as a bad story for Springer's

T. C. Campbell is still of the opinion that the canal bill, for the passage of which he appeared at Columbus last spring, is a perfect canal property was to be given to a ring-the Gang, in fact—and to be sold out by them to the higher, railroad bidder. There were nillions in it. The pretended restriction and sateguards were as talse and fraudulen as an oath or contract by Sam Beresford. Commercial Gazette.

Could it have been as horrid as that Why, there are some rural Republicans, of the "old honesty" sort, that were called into the lobbies to help work that bill through. One or two prominent ones were named by your Columbus correspondent at the time the fight was on-named once, and then sudden eternal silence. One of those thus named advocated the bill "as a perfect thing of the kind," and openly admitted that he was paid to go to Columbus to help press it through-not only admitted, but rather bragged of it. Would such Republicans attorney as bad

ST. JOHN'S CASE.

The evidence is now conclusive that James F. Legate undertook to bargain with the Republican national committee for the withdrawal of St. John as a presidential candidate, and demanded money to be paid to St. John for such withdrawal. His letter to that effect has been published in fac-simile, and there can be no dispute about its genuineness.

Legate at first denied the letter; then declared that it had been garbled; but, since its publication in engraving, he declares that St. John was innocent of his negotiations, and thus implies that he had no authority to speak for him.

But the evidence just published is contrary to this declaration. St. John of course could not transact this business directly and in person. It had to be done through a friend. Legate was his friend, and has long been on terms of the closest intimacy with him. He represented to Clarkson that he was authorized to speak for him, and that St. John was anxious to make terms. Besides, Mr. R. C. Kerens, the man to whom Legate wrote the astonishing letter that has been engraved, testifies that he "saw the letters and dispatches from St. John to Legate to which General Clarkson refers."

As the proofs now stand, there can, we think, be no reasonable doubt that Legate represented St. John and spoke for him by authority. Legate denies it now; but so also he denied the authenticity of his letter till it was put out in his own handwriting. His testimony is thus discredited and discredited by the facts. St. transaction that must render him infamous if confessed or proved. His denial, in a case like this, will not count for anything. He must disprove these damning facts and circumstances now by other facts and circumstances than his own words.

It can hardly fail to be the conviction of all candid minds capable of weighing evidence that St. John is proved to have offered, through Legate, to withdraw or work in the interest of the Republican party for the sum of \$25,000, and that, failing to effect the negotiations, he renained on the track and worked in the interest of the Democratic party. Whether he received any money from the latter does not yet appear, except from inference. The inference would be that, inasmuch as his affiliations and sympathies had been with the Republicans, and as he turned against them and denounced them after his failure to get money from them -the inference would be that he was not too good to ask and receive money of the Democratic party for the help he fur-

nished it in the state of New York. We think that the majority of the people in this country, after these damaging proofs against him in regard to offers of himself for sale, will infer that his sale was finally effected. They will require a great deal of opposing evidence to believe

The saddening feature of this St. John ease is the number of good people who believed in him and were decieved in him the number of good Republicans who voted this government into the hands of the Southern Confederacy by throwing. away their ballots on so unworthy a man. It was a terrible mistake both for the country and for the cause to which they were devoted. Such a mistake, followed by such national consequences and by such a national scandal, can be rapaired only by the resolution never to do the like again.

Itching Diseases

PCZEMA, or Salt Rheum, with its agontsing itch-ling and burning, instantly relieved by a warm bath with Curicus Soar, and a single spoliva-tion of Curicusa, the great Skin Cure. This re-peated daily, with two or three doses of Curicusa itsest visar, the New Blood Further, to keep the hisost VKNT, the New Boost Furtuer, to keep the blood cool, the perspiration pure and unirritating, the bowels open, the liver and kidneys active, will speedily (ure Eczenna Tetter, Ringworm, Psoriasis, Lichen, Fruritus, Scall Head, Dandraff, and every species of Itching, Scaly and Pimply Humors of the Scalp and Skin, when the best physicians and all known remedies fail.

ECZEMA TWENTY YEARS.

My gratitude to God is unbounded for the relief I have obtained from the use of the CUTICKA REMEDIES. I have been troubled with E zenez on my legs for twenty years. I had not a comfortable night for years, the burning and itching were so intense. Now, I am happy to say, I have no trouble. Only the liver-colored patches on my limbs remain as a token of my former misery.

HENRY L. SMITH.

188 West Avenue, Rochester, N. Y.

ECZEMA ON A CHILD.

Your most valuable Curt cura REMEDIES have done my child so much good that I teel like saying this for the benefit of those who are troubled with akin disease. My little girl was troubled with Eczema and I tried several doctors and medicines but did not do her any good until I used the Curicura REMEDIES, which speedily cured her, for which I owe you many thanks and many nights of rest.

ANTON ROSSMIER,
Edinburgh, Ind.

Union Bakery. ights of rest. Edinburgh, Ind.

TETTER OF THE SCALP. I was almost perfectly bald, caused by Tetter of he top of the scalp. I used your turious a Res-deres about six weeks, and they cured my scalp about six weeks, and now my hair is coming back as this J. P. CHOICE.

COVERED WITH BLOTCHES. I want to tell you that your CUTICURA RESOLUTION IS magnificent. About three months ago ny face was covered with blothes, and after using three bottles of RESOLUENT I was perfectly cured.

Zi St. Charles Street, New Orleans, La.

IVY POISONING. For all cases of poisoning by tvy or dogwood, I can warrent CUTICURA to cure every time. I have sold it for five years and it never fails. C. H. MORSE, Druggist.

Holliston, Mass.
Sold everywhere. Cuticura, 50 cents; Soap, 55 cents; RESOLVENT, \$1. Petter Drug & Chemical Co., Boston.

SANFORD'S RADICAL CURE,

The Great Balsamic Distillation of Witch-Hazel, American Pine, Canadian Fir, Marigold, Clover Blossom, etc. Marigold. Clover Blossom, etc.

For the immediate Relief and Permanent Cure of every form of Catarrh, from a Simple Head Cold or Influenza to the Loss of Smell, Taste and Hearing, Cough, Bronchitis and Incipient Consumption. Belief in five minutes in any and every case. Nothing like it, Grateful, fragrant, wholesome. Cure begins from first application, and is rapid, radical, permanent and never failing.

One bottle Radical Cure, one Hox Catarrhal Solvent and Sanford's Inhaler, all in one package, forming a complete treatment, of all druggists for \$1. Ack for Sandford's Ravical ture.

Portug Dayle And Curesuccal Co., Beston. POTTER DRUG AND CHEMICAL Co., Boston.

Collins' Voltaic Electric Plaster Instantly affects the Nervous System and hanishes Pain. A perfect Electric Battery combined with a Porous Plaster for twenty-five c nts. It annihi-lates Pain, vitalizes Weak and Worn Out Parts, strengthens Tired Muscles, prevents disease, and does more in one-half the time than any other plaster in the world. Sold everywhere.

EDUCATIONAL.

Some Timely Suggestions and Opinions or the Subject of Written Examinations-Its Methods and Limitations.

Public Opinion on Educational Subjects Gathered From Various Sources-Over-Pressure in the High Schools.

WRITTEN EXAMINATIONS. The questions and answers in the Journal of Education, under the sub-ject, "Written Examinations," inter-ested me exceedingly. Supt. Ellis sugested me exceedingly. Supt. East-ested me exceedingly. that the "averige opinion of the authorities" may be obtained. The writer is no authority in matters pedagogical, although he would not for a great price part with his experience, however valueless it might be to others. The examination, its methods and limitations, deserves careful study and discussion, especially at a time when there is a quite general movement against this element of school-work. Allow me to throw out

a few suggestions: 1. Whatever form of examination is used, it should be left wholly to the superintendent and teachers. should personally conduct the exami Whatever may be said for or against the examination, it should be labeled "Hands off," not to be trifled with by any board or committee, as no "authority outside of the school-room proper," or competent to handle it. 2. If the examination is a good thing. it certainly is not improved by great frequency, or great length, nor by per-

3. An examination thirty minutes long, given when least expected, is the of a pupil's ready, available, mastered knowledge of a subject.

ecasion for which pupils cram, and

which teachers dread. 5. Examinations, frequent or lengthy, ecessitate, either dismissal of classes for the examination of papers, or the eacher must mark papers at night. In the former case valuable time is lost by John denies it; but he stands accused of a pupils; in the latter, the vital energies of teachers are wasted in doing the most irksome and wearisome work in the world; consequently she reappears before her classes weary in body and mind; pupils thus in either case are

manifest losers. 6. Much examination keeps down the tone of instruction, not only on account of the enervating effects upon the teacher, but for the serious reason that the responsibility of seeing that each pupil does his work well and understandingly will be shifted upon the examination when he gets marked down for inattention and inability. True instruction corrects both evils. 7 Observation leads me to conclude that pupils will, as a rule, work as hard

of frightful mien" intimidated them. 8. When it seems that certain valuable results might be secured by an examination, papers can be marked on the basis of the general effect; i. c., mark the papers as a unit "high," "good," "fair," or "low." Pupils take as much pride in being marked "high" and avoid "low" as carefully as though the absolute number to the

and as thoroughly when there is to be

no examination as when the "monster

ultimate fraction were given. 9. Careful, invigorating, vital instruction is the main affair in a school, and that is wholly dependent upon the teacher and entirely independent of examination.

10. The true theory of instruction is

always to keep fundamental principles before the mind, and thus make every ecitation a review. 11. The recitation, day by day, is the true test of scholarship, -what a

pupil knows, can use, can apply, has vell in hand. It tests, builds up, expands real scholarship. The examinaion proposes certain questions, the inswering of which is mainly done by 12. To base promotions on the re-

sults of an examination, and to deny promotion to those who do not reach an arbitrary standard, places a premium upon memory and expression, and withal, rewards success; while real scholarship (knowledge of principles and the place whence facts can be obtained) and application go unrecog-

teacher's indoment, corroborated by

my own. Each pupil's case is considered separately and specifically. The teacher's response to these interroga-tories settles each case: What is his scholarship? His industry? His ability? His ambition? His health? His attendance? Results: Less commotion and bitterness among pupils; less complaint by parents; equal pride over the promotion; equal respect for and conlidence in the impartiality of teacher and superintendent .- F. B. Gault in Journal of Education.

PUBLIC OPINION.

To obtain the best results we must nake every exertion to improve, to the greatest extent, all the opportunities which are offered. - The Roanoke Colle-

Something is wrong when a child must be compelled to study. The truth is pleasing to the mind, and all instrucion should be interesting to the pupil. Our Country and Village Schools.

Caleb Cushing, in one of the greatest of his great speeches, in speaking of the progress of nations, says: "As soon is we cease to grow we begin to per-This can certainly be said with added and intensified force in regard to the teacher. - Supt. C. S. Smyth,

There is no good reason why scientific men should neglect to apply scien-tific methods to the economy and statistics of every-day life. It is unfortunate that scientific men aspire so exclusively to original research. We need nen to couple love of science with love of mankind. - John Eaton.

School-life should aim at the development of character. Nothing is more essential than noble aims, readiness to work from a sense of duty, ambition for knowledge, and reverence for truth. But the aim to stand high in class, in order to excel one's neighbor, is any thing but noble. That pride which possesses the mind of the gifted scholar, who can easily outrank the less favored one, is in no sense noble.—Supt. S. T. Dutton, New Haven.

No child living in families where there have been cases of scarlet fever. diphtheria, or any other contagious diseases, will be admitted into the publie schools until two weeks after such exposure, and children who have been subject to any contagious disease shall not be admitted into the public schools until one week after entire recovery,the certificate of the family physician being required in all cases as a guaranty of such recovery .- School Regula-

ion, Jonesboro, Tenn. Written examinations of pupils are held quarterly in all the schools, ques-tions being prepared by the superin-tendent. As a stimulant, calculated o reach and influence all grades of intellect among pupils, and to avoid the usual unpleasant and unprofitable result of awarding prizes to one or two meressful members of a class, the following plan has been adopted: Onefourth of the pupils in each grade whose relative class standing is highest in scholarship during the year are, upon recommendation of the teacher of the class and the principal, honorably excused from the final examination by the superintendent and promoted the next higher grade. - Supt. W. M. Crow, Galveston, Texas.

We may hear complaints of overpressure from parents of girls in the high schools. They say that the home essons set cannot, as a rule, be done in the time supposed by the teachers to be sufficient for them, and that their daughters are constantly obliged to work during a great part of the after-noon and evening. The stereotyped retort of the teachers is, "Then have no business to let them. We set down the time which the lesson ought to occupy, and we request parents to ee that this time is not exceeded. If you fail to comply with our request, are we This reply is searcely conto blame? If teachers habitually set clusive. work which they must know cannot be done in anything like the time allowed. one of two things must happen. Either the time-table for home lessons becomes a dead letter, or else the children of conscientious parents, who insist on its observance, compete at a disadvantage with others whose parents do not trouble themselves at all in the matter. - London Journal of Education.

A Wonderful New Substance.

Paraffine wax has to-day no successful rival for the insulation of electric wire, and the growth of the demand for this purpose keeps pace with the marvelous growth of the electric-lighting system. A single Chicago concern buys paraffine wax by the car-load. Its price is but half that of beeswax. The demand for paraffine for candles as yet heads the list. Then come the needs of the paper-consumers. In 1877 a single firm in New York handled 14,000 reams of waxed paper. This year their trade will be 350,000 reams. Not only for wrapping candy is this paper in valuable, but fine cutlery, hardware, etc., incased in waxed paper is safe from the encroachment of rust or dampness. Fish, and butter, and a score of other articles are also thus wrapped, and there seems literally no end to the uses found for the paper saturated with this pure hydro-earbon. In the chemcoating for articles exposed to all manner of powerful dissolvents; brewers find it a capital thing for coating the interior of barrels, and the maker of wax flowers simulates nature in sheets

No fairer substance ever sprung from most unpromising parentage than the snowy, pure, tasteless, opalescent wax which is evolved from the loud-smelling, pitchy dregs of the petroleum still. This comely, impressionable article, with all its smooth soft beauty, defies agents which can destroy the precious metals and eat up the hardest steel as water dissolves sugar. Sulphuric and other potent acids have no more effect on ozokerite than spring water. It is alike impervious to acid and to moisture. Its advent seems to have been a special dispensation in this age of elec-

Every overhead electric-light cable, or underground conduit, or slender wire, cunningly wrapped with cotton conducting the subtle fluid to the presence of this wax. And in still more familiar forms let us outline the utility of this substance. Every gushing school-girl who sinks her white teeth into chewing-gum chews this paraffine wax. Every caramel she eats contains this wax and is wrapped in paper saturated with the same substance. The gloss seen upon hundreds of varieties of confectionery is due to the presence of this ingredient of petroleum, used to give the articles a certain consistency, as the laundress uses starch. So that a product taken from the dirtiest. worst-smelling of tars finds its way to the millionaire's mansion, an honored servitor. It aids to make possible the electric radiance that floods his rooms; or, in the form of wax candles, sheds a softer lustre over the scene. It polishes the floor for the feet of his guests, and it melts in their mouths in the costliest candies.—Independent Record.

It is said that one tree marks the eorn r of three counties in Ohio, Wood. Hancock and Seneca, and a cow rubbing her sides against the trunk n Hancock County, chews her cud in Senece and brushes flies in Wood.

A Cleveland lady promenaded the with a card on streets for two hours her cloak reading: "Former price, \$20; marked down to \$12 to close out."
